

What is Collaboard?

1 At a glance

Collaboard is a **digital whiteboard** with the **highest level of data security** for safe, efficient and reliable collaboration.

With its simple and **intuitive user interface**, the first boards can be created very quickly - whether with mind maps, sticky notes, multimedia content or the large collection of templates for almost any case.

- ✓ Swiss online whiteboard with the highest level of data security and first-class reliability
- ✓ **Fully GDPR-compliant** and customisable for companies
- ✓ Conduct strategic meetings, innovative workshops, extensive training sessions, **creative brainstorming sessions** and much more across departments and around the world
- ✓ Synchronised collaboration between an unlimited number of users worldwide - on an **infinitely large whiteboard canvas**

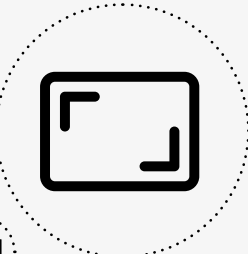

2 Features

Collaboard offers a wide range of whiteboard features to create the **best digital workshop and meeting experiences** - remote, hybrid or on-site.

✓ **Over 150 templates:** SWOT analysis, break-out groups, retrospective, business model canvas, mood barometer, coordinate system, annual plan, organisation chart and many more

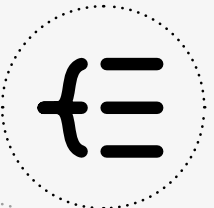

✓ **Moderation functions:** Votes & ratings, timer, lock, pin, hide, presentation mode, focus mode, quick links

✓ **Management functions:** Activity logbook, versioning, background colour, sharing, permission management, spaces, tags

✓ **Customisability:** Branding, enable/disable functions, custom data security disclaimer, custom duration for sharing links, disable guest users

✓ **Hosting options:** Open Telekom Cloud (Germany), Microsoft Azure (Switzerland & Netherlands), On-Premises

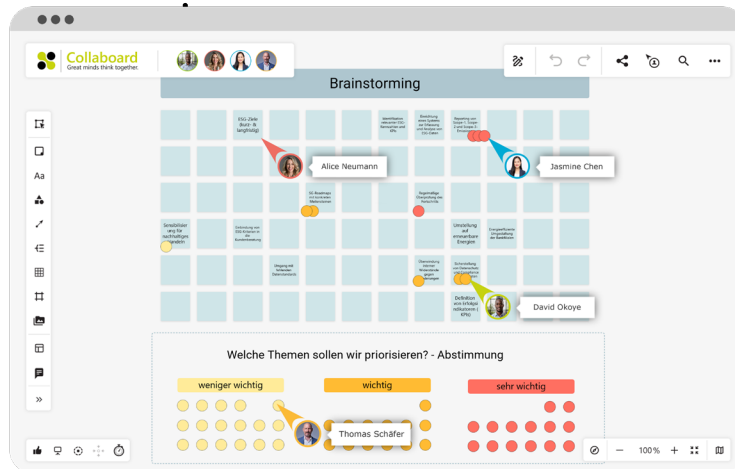

✓ **Integrationen:** Microsoft Teams, Cisco Webex, Pexip, Nextcloud, Rocket.Chat, Jira, Confluence, Public API für eigene Integrationen

✓ Continuous development of **new features and functions** on an open roadmap for an even better user experience

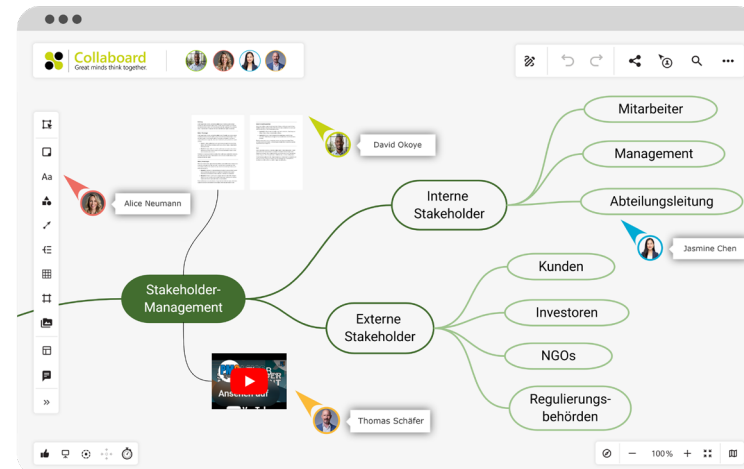

3 Practical examples

Interactive workshops

The workshop begins with a brainstorming session in which users place their ideas on a **template** on the board at the same time. Afterwards, points can be used to vote which of the ideas should be prioritised.

The moderator of the workshop sets a **timer** so that all participants complete their tasks punctually. Thanks to the seamless **integration** of Collaboard into MS Teams, the window does not need to be changed during the session and everyone continues to work in MS Teams.

Global mind mapping

For the strategic planning of stakeholder management, 4 users from different divisions and countries of the company create a mind map and work simultaneously on the endless whiteboard canvas using the **mind mapping tool**.

They use **comment** functions for mutual feedback and questions. **Multimedia** content and **PDF** documents are placed on the board and linked to the mind map to expand the context of the topic.

Collaboard always offers **maximum data protection**, including ISO and BSI-certified data centres in Switzerland and Germany.

The possibilities of Collaboard are almost endless. Our customers regularly tell us that they **use Collaboard for these purposes:**

- ✓ Projects in compliance with data protection regulations such as **GDPR**
- ✓ **Training, workshops, onboarding, presentations or meetings** that take place across countries and languages
- ✓ Efficient and content-rich brainstorming sessions with a large number of users
- ✓ **Quick and easy visualisation** of complex processes, challenges, projects and organisational structures
- ✓ Knowledge sharing and strategic and operational **decision-making** by the entire team

4

What our customers say

Well-known organisations such as **Liebherr, regio IT, Deutsche Giganetz, the Canton of Bern, the University of Kassel, Pronova BKK and BG ETEM** have been using Collaboard successfully for years.

«I mainly use Collaboard in online meetings. One of the points where Collaboard always pays off? Everyone gets the opportunity to visualise their ideas and thoughts in the context of the discussion.»

Benedikt Röthlin
Organisation & IT at Liebherr

«The biggest benefit for everyone is carefree use. Users appreciate the data protection, reliability and limitlessness of the tool.»

Jacqueline Gerland
Team Leader IT-Customer Service at University Kassel
